PROFILE

Distributed systems architect and Elixir specialist with 13 years of commercial experience. Background spanning AI agent infrastructure, real-time multimedia processing, water telemetry systems deployed across 20+ countries, telecom platforms, and open-source language design. Forbes 25 Under 25 awardee (New Technology, 2020). Founded and exited a transportation tech startup at age 19.

EXPERTISE

Core Technologies	Elixir, Erlang/OTP, TypeScript, Distributed Systems, Event Sourced Architecture
AI & Agents	Agentic Architectures, MCP Servers, A2A, LLM Integration, Local Model Deployment
Developer Tooling	Code Intelligence (AST/tree-sitter), Language Design, Editor Tooling, Data Pipelines
Frontend	React.js, Next.js, Tailwind CSS
Infrastructure	InfluxDB, TimescaleDB, PostgreSQL, VoIP/SIP/RTP

WORK HISTORY

AI Infrastructure & Elixir Developer
2025–2026

Thenvoi · Remote

- Built core infrastructure for the Agentic Mesh platform — a secure communication layer enabling AI agents to dynamically discover, collaborate, and orchestrate tasks.
- Contributed to AI orchestration, inter-agent communication protocols built on open standards (MCP, A2A), and centralized agent management.
- Developed human-agent collaboration features for shared working environments.

Elixir Developer
2024–2025

Software Mansion · Poland (Remote)

- Contributed to Membrane Framework, an open-source multimedia streaming framework for Elixir supporting WebRTC, HLS, RTMP, and various codecs.
- Developed observability tooling for real-time multimedia processing pipelines.

Elixir Developer
2021–2023

Confly z o.o (Priv) · Poland (Remote)

- Designed and built the telecom platform for Priv — a virtual phone number app with VoIP and SMS, handling instantaneous number acquisition and Polish telecom compliance.
- Designed and developed an in-house Event Sourcing system from scratch.
- Designed and developed a custom VoIP telecommunication protocol.

Elixir Developer (Founding Team)
2016–2021

Inflowmatix Ltd (acquired by SUEZ) · Southampton, UK (Remote)

- One of the first three developers to build the InflowNet real-time water telemetry platform, now deployed in 20+ countries.
- Designed a fully distributed Elixir architecture processing gigabytes/sec with 99.999% annual availability.
- Managed databases including InfluxDB, Mnesia, TimescaleDB, and PostgreSQL.
- Designed and operated a cluster of 20+ machines on AWS with event-sourced architecture.

CEO / Founder 2014–2021
Neon Tree Solutions Ltd · Kraków & London

- Led a software consultancy (3–5 engineers) specializing in cutting-edge proofs of concept using Erlang, Elixir, Scala, React.js, and ReasonML.
- Responsible for the first prototype of the Erlang Performance Lab project.
- Managed cross-border operations between Poland and the UK.

CTO / Co-founder 2015–2016
Man La Mode LLC · Kraków & Ann Arbor, MI

- Built the backend in Elixir and oversaw frontend development in React.js for a luxury fashion buyers club.
- Engaged directly with investors in Ann Arbor, Michigan.

CTO / Co-founder 2013–2015
CloudCab LLC → LightDispatch (acquired by WideTech) · New York (Remote)

- Built a white-label B2B dispatch platform for taxi, medical, and cargo transportation. Led a team of four.
- Developed Android apps (customer + driver), Node.js backend, and fleet dispatch admin panel.
- Successfully acquired by WideTech (Colombian GPS/fleet company, 18+ countries).

SELECTED PROJECTS & ACHIEVEMENTS

Forbes 25 Under 25 **Forbes Poland & McKinsey & Company**
New Technology Category (2020)

Cicada **github.com/wende/cicada**
AST-based code intelligence MCP server for AI assistants (tree-sitter/SCIP). Indexes code structure and GitHub PR history across 17+ languages. Up to 50% faster responses and up to 70% fewer tokens (benchmarked). Listed in awesome-mcp-servers.

Elchemy **github.com/wende/elchemy**
Statically-typed language for the Erlang VM, inspired by Elm and Haskell. 1,000+ GitHub stars.

Autocomplete Elixir **github.com/wende/autocomplete-elixir**
#1 most popular Elixir/Erlang plugin for Atom Editor. 60,000+ downloads. Semantic completion via live BEAM introspection.

MobileClaw **github.com/wende/mobileclaw**
Open-source mobile-first AI chat client for OpenClaw/LM Studio. Streaming, tool execution display, inline diffs, sub-agent feeds.
